As a developer I build modern UI components to improve application performance using React Js and also I have worked with Node Js to create server, APIs, Communication path between server and Data base by writing server side logics. I also have a good knowledge about HTML, CSS and JavaScript and i have worked closely with testers, designers, and project managers to create a robust and effective application.

Work Experience

Associate Software Engineer

Test Yantra Software Solution Pvt. Ltd.

08/2021 - 03/2023

Projects:

“Property Drive” (11/2021 - 05/2022)

Responsibilities

- Creating Re-useable Components by React JS.
- Login Logout Functionality.
- API calls from back end.
- Added Searching and Filter Functionality.
- Make the application responsive using media query and bootstrap.
- Validation for the forms (Validate the user information before sending the data to back-end).
- Navigation from one page to another (Making SPA using Routing).

“Chat Bots” (05/2022 - 03/2023)

Responsibilities

- Discuss the use-cases with the business analyst of a particular chat bot.
- Create an overview or a workflow of the chatbot.
- Create the chatbot by using yellow.ai app or cloud platform from scratch.
- Demonstrate the bot to the Business Analyst or sometimes to the client.
- Resolve the bug or issues with the bot.
- Integrate the bot with different channels like WhatsApp, Facebook, line etc.,
